

RFID TRACKING AVAILABLE

Never lose sight of your pallet inventory again.
Stay one step ahead, remotely locate your goods.

Fisher's are here to streamline your transport and logistics, and pallet management. Take control of your company's operations and minimise inventory loss with RFID technology at your fingertips. Know the location of your pallet and stock as they check in and check out during their journey.

FISHER'S PALLET

WAREHOUSING & LOGISTICS
SOLUTIONS

Looking for an alternative to hiring pallets?

A SOLUTION FOR INTERNAL PALLET POOLS

Why rent the pool when you can own it!

- For certain customers the benefits of pallet ownership will far outweigh the short-term benefits provided by renting
- Everyone needs to optimise their supply chain investments to ensure they remain competitive
- 80% of businesses using rental pools have experienced paying for pallets they no longer have in their warehouse according to CSCL (Centre for Supply Chain & Logistics) Australian Pallet Survey 2017 Report

FISHER'S WAREHOUSE PALLETS

What is it?

- The Fisher's Warehouse Solution uses Australian Standard Pallets: 1165mm x 1165mm x 150mm
- Fisher's Pallets are designed and built to last for more than 10 years with normal use
- Pallets can be stencilled with your company name or logo
- Repairable and trackable with each pallet potentially having two RFID tags
- Available in heavy, medium, light duty and double width
- Colour-coded edging available for inventory management
- Notched bearers available - making 2-way entry pallets into 4-way entry

Who needs it?

- Companies that operate closed-loop supply chains
- Companies that have pallet pools that are shipped to a limited and known client-base
- Warehouses with Australian Standard Racking System

Why Fisher's?

- Lower total cost of ownership and improved control
- Digital design services provided by Fisher's predict service life and load capacity
- Instant reporting on pallet inventory levels and location with RFID solution along with much faster stocktaking
- Cash flow support from Fisher's to smooth out the transition (direct debit payments)
- No internal pallet management resources (a real hidden cost in the supply chain)
- No lost pallet charges and no admin fees
- No paying for pallets that don't exist and less frustration
