# PRODUCT SELECTION GUIDE

A guide to finding the right packaging solutions for your business

## We are quality pallet & crate manufacturers

Fisher's is an Australian-owned family business located in Morwell, Victoria. We have over 60 years' experience working with timber and over 30 years' in the pallet industry. Our strong reputation is built on a history of servicing the needs of our customers and adjusting to meet changing requirements. We pride ourselves in providing exceptional customer service and delivering quality products.

All of these items can be made to the dimensions and load capacity you require.

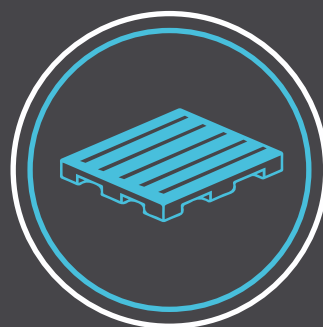

### SKID

A single deck loading platform commonly used as a foundation for heavy machinery and transporting light goods.

**Ideal for:** use as a foundation for permanent assets and goods.

**Additional Features:**

- **Stencilling or Branding:** your company name/logo
- **RFID:** for asset tracking
- **ISPM-15 Export Certified:** heat treated for export requirements

### PALLET

For storing and transporting goods of any size, anywhere.

**Stringer/2-Way Entry Pallet**

Stringer pallets use boards to support the unit load. Whilst less efficient than 4-way entry pallets for moving goods, the use of fewer components often makes it more affordable.

**Block/4-Way Entry Pallet**

Block pallets use blocks to support the unit load, and provide increased durability, load capacity, and efficiency when moving goods compared to 2-way entry options.

**Ideal for:** transportation of a wide range of goods. Our pallets can be customised to increase transport/logistics, load bearing, and operational efficiencies through Pallet Design System™.

**Additional Features:**

- **Stencilling or Branding:** your company name/logo
- **Colour-Coded Edging:** for inventory organisation
- **ISPM-15 Export Certified:** heat treated for export requirements
- **RFID:** for asset tracking

### CRATE

The ideal packaging solution when full coverage isn't necessary. The reduction in materials means a crate weighs less than a box of the same size, saving on manufacturing and transport costs. An example of this would be produce bins, commonly used in the agricultural industry to transport goods.

**Additional Features:**

- **Stencilling or Branding:** your company name/logo
- **ISPM-15 Export Certified:** heat treated for export requirements
- **RFID:** for asset tracking

### BOX

A fully enclosed packaging solution, ideal when the protection and security of your goods is a top priority. If security isn't a main concern, then a crate might be worth considering. Boxes and crates can be supplied as a flat pack.

**Additional Features:**

- **Stencilling or Branding:** your company name/logo
- **RFID:** for asset tracking
- **ISPM-15 Export Certified:** heat treated for export requirements

### The Fisher's Difference:

We strive to offer consistent quality across all products. Be sure to ask about:

- Customised Solutions
- Payment Transition Plan to help you own your pallet pool
  - Pallet Design System™
  - RFID Tracking Solution
